## CONCEALED FLUSH VALVES

A flush valve is a **self-closing valve**.

- ✓ Material : CPVC & uPVC, Sizes: 1½" X 1¼" & 1¼" X 1¼"
- ✓ Operates from 0.5 bar to 3 bar
- ✓ Chrome plated flange
- ✓ Eliminates brass connection, saving cost for 2 MABT
- ✓ Easy to install with plain sockets
- ✓ No chances of rusting and pitting

**Higher Efficiency  
& Greater Savings**

A flush valve is a self closing valve designed to release a large volume of water when actuated. This mechanism is used to flush a toilet.

Benefits:

- **Cost Saving**

Saves 1 MABT & 1 FABT Cost

- **Saves Installation Time**

Approximately 50% more time saving compared to Brass Fitting

- **Reduces Installation Failure**

Due to reduced number of joints

- **Easy to Install**

Easy to install with plain sockets

Available Range:

- Sizes: 1 1/2" X 1 1/4" & 1 1/4" X 1 1/4"
- Operates from 0.5 bar to 3 bar pressure
- Chrome plated flange

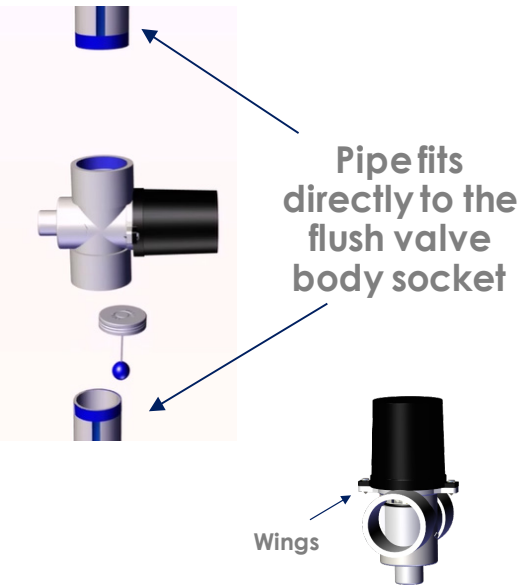

Unique Selling Point:

Higher efficiency & greater savings
